#LetUsPlay

Cambridgeshire FA have launched a new initiative to raise awareness on the importance of adults creating a positive environment at grassroots youth football.

We asked our young players, they said Let Us Play!

Each week, we are asking each team to nominate a player to complete a short survey about their match from the weekend.

We really believe this will give us the opportunity to understand how young people feel about their football experience and help us to support the areas where poor practice is in place. Good practice will be shared anonymously via our social media channels. During the pilot phase of this project, there were so many fantastic examples of good practice, and we can't wait to start sharing this information with everyone!

Silent Support Weekend

The second national Silent Support Weekend has been confirmed for the 25th/26th February 2023. This iteration will see coaches permitted to provide vocal support to their players whilst spectators will be requested to provide silent support through applause only. This change is based upon feedback from the first weekend and will see a greater emphasis given to the desired coaching behaviours believed to be required for developing a positive playing environment.
