COMMERCIAL TURF

JOHN DEERE X590 RIDE ON MOWER with 54" deck and twin cylinder 26HP Kawasaki engine are designed for power and productivity. Its robust frame, combined with the high capacity engine does the heavy-duty work you need it to. Hydrostatic twin pedal transmission and on board deck levelling assure the best performance and cutting results every time. Designed to mow fast, the deeper draw and flat top design create a better quality cut at faster ground speeds. Its wide stance enhances stability and with hydraulic powered steering as standard it provides excellent manoeuvrability.

SCH 48" TOWED CARRIER FRAME + AERATOR ATTACHMENT is an ideal tool to improve drainage and allow air to penetrate the roots. Aeration is important to reduce surface water, reduce turf compacting, reduce thatch build up and boost the health of lawns and the SCH Towed Aerator will serve your aeration needs to provide top class lawn treatment. Its three 25 litre tanks, when filled with water, provide ample weight to help penetrate hard surfaces.
