

Covid 19: Pitch Closure Maintenance Guidance

Issued By: Technical Surfaces / Date: 06/05/2020

| Process / Item | Frequency / Recommendation |
|--|--|
| IN-HOUSE MONITORING / DAILY CHECKS | Daily |
| LEAF/FLORA COLLECTION & LITTER PICKING | Daily |
| DRAG BRUSHING, INCLUDING LIGHT DECOMPACTION WITH TINES FOR 3G SURFACES | Minimum, twice per week for 3G surfaces and once per week all other surface types, <i>unless otherwise specified.</i> (see installer / manufacturer maintenance guidelines) |
| TOP-UP HIGH WEAR AREAS | Assess the surface and redress any low areas in advance of reopening. |
| MANUAL WEED REMOVAL | Daily |
| CHEMICAL TREATMENT FOR WEEDS, MOSS AND ALGAE | As required |
| SPECIALIST POWER SWEEPING, INCLUDING DECOMPACTION WITH TINES FOR 3G SURFACES | Continue with your normal regime if possible. Where contracted, an initial extended visit should be completed after reopening. |
| SANITECH® | As required* |
| POWERGRADE® | Annually** |
| REVITE® | Annually** |

* Contact Technical Surfaces for a quotation.

** We recommend that this is completed this year to help to reduce any surface performance issues that may have developed / be developing as a consequence of the extended closure.
