

A PATHWAY TO PLAY FOR ENGLAND

We actively support The FA's Talent Pathway, which provides an opportunity for players with learning, physical or sensory disabilities to reach their potential, which could lead to representing their country in world competitions.

As part of this talent pathway, Northamptonshire FA operates The Northamptonshire Player Development Centre, which leads to Regional Impairment Centre of Excellences and from there; players are selected to represent National Impairment Squads.

The purpose of The FA Disability Player Development Centre Programme is to identify players deemed to have a higher level of ability and place them in a technical programme designed to promote individual football development and promote progression to and involvement in Regional Impairment Specific Centres of Excellence or mainstream football activity.
