- These arrangements remain subject to alteration but only if necessary for unseen circumstances at this time

We are grateful to the venues for working with us to be able to provide confirmed details to everyone involved. Where we tried to share the fixtures around the venues, we made sure that we didn't interfere with their own events. Whilst it is a tight program, we are fairly confident that that we won't lose any games, especially those being played on the 3G surface at Oxford City. This means that disruption to clubs and leagues should be at a minimum and avoid late postponements.

We hope the clubs and their players enjoy their experience and especially the youth players for whom this may be their first experience of playing on a 3G surface. Parents need not worry as normal boots are quite suitable to play on this surface.
