The ultimate goals:

1 Double the numbers of players within the current system from 1,722, to over 4,200. This will enable a bigger talent pipeline to come through the system and create more opportunities for everyone.

2 Ensure any young player with potential can access an Emerging Talent Centre within an hour's drive from their home.

3 Delay player selection decisions into performance squads until players are slightly older.

4 Almost double the number of training environments that young players can access, from 39 to 70.

5 Increase playing time and offer varied and enhanced football experiences.

6 Increase the quality and diversity of players who progress through the pathway.
