

Impairment Specific Football

Mental Health Football

Football can have a major impact on mental health. It is thought to affect emotions, relationships, identity and self-esteem. In a recent study, one in four fans said football was one of the most important things in their lives. We are committed to using football to tackle discrimination and enable people to live more independent and fulfilling lives.

Kent FA are currently looking for teams to join our NEW Mental Health League. This will help to provide players with Mental Health conditions with more regular localised football competition as opposed to one off events. We want to hear from individuals, organisations or teams that wish to join the league.

Deaf Football

Kent FA is committed to opening up football to deaf people. Deaf football is a relatively new initiative but we are making positive strides to attract more deaf players into the game.

Three of our Kent clubs have now achieved the prestigious Deaf Friendly Football Club award from the National Deaf Children's Society. This award ensures that a club offers appropriate football coaching and resources for deaf players.
