

Players' Email Tab

The Players' Email tab has been designed to give clubs a simple method of adding emails & mobile numbers to their over 16 players.

Head to the Players' Email tab in the left hand menu and you will initially see a list of players that have not yet had an email address assigned. Selecting "Any Email" will show all your players.

Players who have logged into WGS in the last 12 months will show any data currently in WGS but they will be locked for editing due to GDPR. Players will be able to edit their own details in their "Home" tab.

Exporting Data

By clicking "Export all to CSV", you will get a download of all your players and any email & mobile data attached to them.

Within the filter bar, there is also the option to export your filtered results only to CSV.
