

You'll need the right equipment to help you successfully and safely complete a clean-up.

If you're attending an organised clean-up, your host should have arranged equipment in advance of the clean-up.

Please ensure you have considered the weather and are wearing suitable clothing/ shoes, and have enough to drink. If it is warm, consider suncream/ hats.

If you are doing your own thing, or your host asks you to provide your own equipment, we have a couple of suggestions:

Wilko, a headline sponsor of the Great British Spring Clean, is stocking a range of litter-pickers, high-vis vests, hand sanitiser and gloves in store to help people get prepared for the country's biggest ever clean-up. Find your nearest store

Alternatively, your local council recycling officer may be able to loan you the equipment you need. This year, we asked every local authority to provide us with information about whether equipment can be borrowed, so please check our website for more information.
