70%
alcohol

kills 99999%
of germs

works instantly
without water

SYR PROTECT

HAND SANITISER GEL

Protecting Hands and Reputations

Shortages of hand sanitisers throughout the world has led to a rise in the number of unsafe and non-compliant hand sanitisers appearing on sale within the UK. At best, these products are not working effectively, at worst they are dangerous. With falsified certification being widely used it is very difficult to know what is genuine and safe to use. As a trusted brand, we wanted to be able to provide our customers with a hand sanitiser gel that is fully compliant to EN standards and completely safe to use, whilst still offering a competitive advantage within the marketplace. With this in mind, we have developed SYR PROTECT, a range of sanitisers and associated products which are manufactured according to the strictest guidelines. Our hand sanitiser gel is designed, formulated, quality tested and certified within the UK, so you can be sure of its quality and safety.

USE ONE OUTSIDE...

...AND ONE INSIDE

994481 | CS9

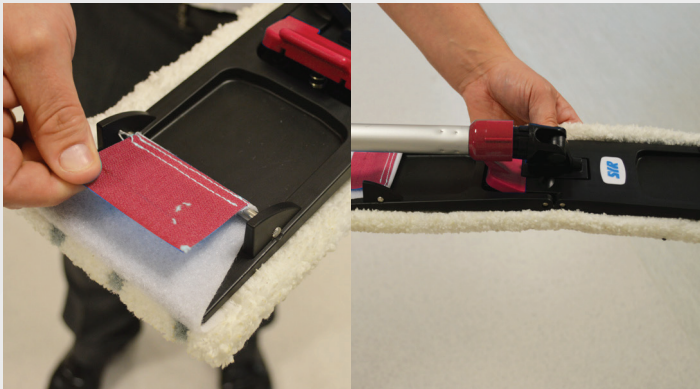

HOW TO

ATTACHING MOPHEAD

KENTUCKY

- 1 Open clip on the Kwiki II Mop Holder
- 2 Kentucky mophead slides into place
- 3 Close Kwiki II Mop Holder, the plastic teeth ensures the mophead stays secure

ATTACHING MOPHEAD

FLAT MOP

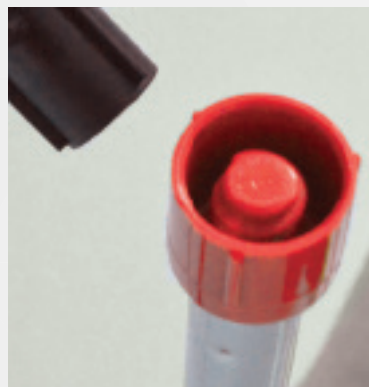

- 1 Place Snapper frame directly on top of the microfibre cleaning pad
- 2 Use the hook and loop coloured tabs to secure the cleaning pad to the metal pins on each end

USING INTERCHANGE HANDLES

Our Interchange handles can be used to fit a multitude of cleaning products, and allow easy swapping between items.

Simply line up the ferrule and twist the handle on to create a secure connection

Look out for the SYR Interchange compatible logo

FILL BUCKET

Fill the mop bucket with water up to the required fill level (shown by the line on the inside of the bucket.)

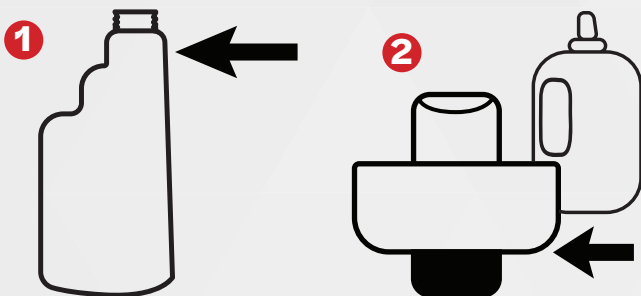

ADDING CS CHEMICAL TO BUCKET

Pull the wringer down to reveal the built-in chemical portion pod control. This will provide the perfect dosage of chemical for the water in the bucket

ADDING CS CHEMICAL TO TRIGGER SPRAY

- 1 Fill trigger spray bottle with 600ml water (preferably warm water)
- 2 Fill tip of chemical cap with CS9 to fill level and pour into 600ml spray bottle
