FOR ALL
ANTI-DOPING

STRICT LIABILITY

As a player you are solely responsible for any banned substance you use or that is found in your system, regardless of how it got there and whether there was an intention to cheat or not.

Remember, it's your body,
your responsibility and
your career.

THE PROHIBITED LIST

The World Anti-Doping Agency (WADA) Prohibited List details the substances and methods that are banned in football.

It is updated at least annually, and is effective from 1 January each year.

As a Player you should ensure you know what is included on the List, which can be found at the WADA website: www.wada-ama.org

PROHIBITED LIST

ASTHMA

If you are asthmatic, make sure you check the banned status of your inhaler. Certain inhalers are banned, or banned above a certain threshold.

You can check the current permitted thresholds at www.globaldro.co.uk

ASTHMATIC?
KNOW YOUR LIMIT.

Taking **too much** of your inhaler could lead to a ban from football.

THERAPEUTIC USE EXEMPTIONS

Therapeutic Use Exemptions (TUEs)

This process gives players a means of attaining approval to use a prescribed banned substance/method for the treatment of a medical condition.

Check whether
your medication
is banned using
Global DRO at
globaldro.co.uk.

How to apply:

- If your medication is prohibited check that you cannot take a permitted medication instead.
- Find out if you are at a level of competition that requires a TUE to be submitted in advance by checking the FA Anti-Doping Regulations or with your club doctor or physio.
- If a TUE is required complete the relevant TUE form, attach the required medical evidence and send to UKAD*.
- A TUE form must be signed by the doctor who prescribed your medication and you should consult with your club medical staff before applying.
- For more information about the TUE process consult the FA Anti-Doping Regulations or log on to www.ukad.org.uk/

* If your club is involved in UEFA or FIFA competition at the time that you need to apply for a TUE you should consult UEFA or FIFA Anti-Doping regulations.

SUPPLEMENTS IN FOOTBALL

Players are strongly advised to be very cautious if they choose to take any supplement such as vitamin tablets, energy drinks, CBD products or sport-nutrition formulas. This is because there is no guarantee that any supplement is free from banned substances.

Assess the need

Seek expert nutritional/dietary advice, you may not need supplements.

Assess the risk

Know, understand and address the risks of contamination.

Assess the consequences

You could receive a four-year ban from football.

You can reduce the risks by:

- Undertaking thorough internet research.
- Only using batch-tested products.
- Checking on InformedSport.com (which is a risk minimisation programme) that the supplement has been batch tested.

SOCIAL DRUGS

BANNED FROM FOOTBALL
PUBLIC SHAME

TERMINATED CONTRACT
ADDICTION

Social Drugs are banned by The FA at all times.

IS IT
WORTH
IT?

The FA Social Drug Programme is run completely separately from the Anti-Doping Programme. Hair samples will be the primary collection method, enabling a faster process and providing an increased detection window.
